**O/o the DM and Collector, 2<sup>nd</sup> floor , Office Lane,  
Agartala, West Tripura District, Pin 799 001**

Organisational Structure:

**DIO & DIA**

Mission and Objective:

Since its inception the NIC West Tripura District Unit is a pioneer in implementing many successful e-Governance Projects as required by District Administration, West Tripura.

Information Technology (IT) has now become an integral part of the administration. Computerization not only helped District administration in decision making but also increased the efficiency of the administration to a great extent. Management Information Systems/ databases, developed and implemented in the district, were of great help to the Administration.

It is our endeavor to continue the enhancement and enrichment of West Tripura District site in terms of its content, coverage, design and technology on a regular basis.

Success Stories:

The following is a glimpse of successful e-Governance initiatives of NIC, West Tripura District Unit:

**Implementation Aadhaar enabled Bio Metric Attendance System at West Tripura District:** The proposed system would enable an employee to register attendance by pressing his/her biometric [ finger print/Iris] which will be authenticated online by doing one to one match with the bio-metric stored in the UIDAI data base against the employee's Aadhaar Number.

In the first phase of implementation, approximately 280 employees have been registered under West Tripura District Magistrate & Collector domain. Client's terminals have been installed in the location selected by employees of this Collectorate. The project is running successfully in this District.

**Implementation eDistrict Project :** eDistrict is Mission Mode Project, implementing at West Tripura District and thereafter role out in this State.

**Election Database [Employee database, EVM, Counting Process]** : Technical support was provided in assembly, loksabha, ttaadc, panchayat and bye election. Activities like availability of candidates information, affidavits hosting, result processing, randomization of polling parties and deployment, EVM machine randomization, communication plan etc. were taken care by Election Software Suite.

**NICNET Support:** Technical support has been providing the Network connectivity for this Office and adjacent other offices for smooth working of Network.

**Arms license monitoring system:** Maintain National Database of Arms License System for renewing the arms license from this Collectorate.

**DAK Monitoring System:** Implement DAK Monitoring system and provide technical support for the user.

**Jami and Registration:** Jami software designed, developed and implemented by NIC Tripura and its testing done in this District Unit.

**Training Component:** Provide training on various application software of State and national level as per requirement of user. We provide training as a faculty member.

**Design District Website:** <http://westtripura.nic.in> is the official website of the government and provides information to other line department like agriculture, fishery etc.

**Payroll Packages:** implement online paybill software and provide technical support for user for smooth functioning of this package.

**VC Facility:** Maintain VC studio and provide technical support for VC with other end. We also create the accounts for all BDO and SDM for conducting webvc with them as multipoint VC.

**eRoR** : Ordinary Resident Register is a physical register maintain at lowest tier of self government (urban as well as rural), to record the details of the citizenry. A citizen is not entitled to civic services and benefits unless their names are recorded in register. The eRoR application is developed by NIC Tripura State and implemented in West District
